VaiNarQ (music for poetry reading) was originally composed as background music for reading: poetry by Ukai Rope/Hisaka Yogo. (these two names are used for the poet. both the new name and the old one.) in December 2005, he asked me how to record his readings with background music into a personal computer, possibly, with new original music. in March 2006, he brought me his rehearsal recording of poetry readings with his pianist friend playing background drone 'cosmic' organ sounds. the duration of this recording is over 38 minutes. VaiNarQ (music for poetry reading) is composed from the images of this rehearsal recording. I dubbed his alternative poetry reading over this new original music.
